

# How to Telecontrol Your Lovely Dog?

## Preface

Dog is loyal friend of people. It has been a long history to feed, train and use dog since original society. With long term being trained and getting along with people, dog can help people to hunt, look after the house, shepherd, save, seek, arrest and guard. As one of nice assistant of people, their excellent performance has been proved and trusted by our people. Especially, in latest decades of years, pet dog are finding more favor with their small body, lovely feature, beclivity, well understanding and loyalty.

Dog's lofty abilities are relevant to scientific and patient training from people. Common training method is oral instruction, gesture and abduction, with combination to award and punish. On the basis of traditional training methods, here are some mysterious tips of advanced ultrasonic, which are executed by "cute dog", such a small machine can offer you twice the result with the half effort.

### 1. Defecating at ordered place

At the beginning of coming to your family, it may defecate where it think convenient and ignore your frequent clear up. Just because it is a dog, your lovely dog, you never would like to be angry with its acting up... But how to solve this matter? Is there an effective way or not? Answer is "yes"!

In generally, dog always defecate after it eat enough or get up at early morning or long sleep. At this time, you can take some its excretion to the place you order for it at washing room, take it there, once it start to smell on it, then close the door, make it smell where you set its excretion, till it finish here, then you can clap its head, daut its

neck, praise its clever full of love sound, then award it some prepared favorite food, then get it out. You need do like this for several times at start, if he forget it, you can blame it loudly, then do like above tip, time and time again, it will understand what and how to do as you like, then be used to defecate at ordered place.

### 2. Coming back once you order

When you take it outside at spare time, it may go where it like so that you can not control it along side you, that is a challenge for your leading authority, even unsafe for your dog, why not try to control it by this machine?

Training method: Firstly, turn the on-off to training state (middle grade), keep the machine straight to your dog when it is not far away from you, then press the BEAM button for three times and stay about half second, then some similar Morse code means sign " — — — "; Now you call its name (it is better to give it a ringing name) and gesture to let it come back to you. Remember that you need make the same gesture for each time. When it come back, you need award it some its favorite food. Just do like this frequently, it is not suitable

to cancel gesture until it used to come back when you use machine, at next each short time, try to cancel order instruction, then gesture, then awarding food, at last, only depend on the machine, it can come back soon, now you succeed.

In order to keep and strengthen such conditional reflex, in future time, it is nice to give some food when it comes back to your order. The key is to take enough pains, do not blame or beat it, do not use this signal machine when there are other dogs.

### 3. Training to sit down

If you do not hope it go far away from you, you can train it to sit down aside you. Training details as followings:

Let it stand at left of you, your right hand should pick up its neck wire, then left hand press its buttocks down. Short press BEAM button and say "sit down" to it. Please note that, in each time, the time spent on pressing BEAM and ordering instruction should be basic same. Praising it when you find it is about to sit down, at the meantime, giving it a comfortable daut on its back. Do like this frequently, till it sit down once receive the sign of the training machine. Then try to do like Training 2, cancel the awarding and order instruction, let the dog reflect to the sign correctly.

### 4. Training to stand up

Take it to a peaceful place, ask it to sit down. After a while, use your right hand pick up its wire, left hand haul its belly up to the ground, ask it to stand up and push the long and short buttons " — — — ", it will stand up. Award it food, and then follow up above three tips. You need help it to train like that for times till it can stand up once

you push the buttons only.

### 5. Training to wallow on ground

How to teach it to wallow on ground? Just try to do like this: take foods around its head and ask it to wallow, another hand press the machine and take around, it will be tempted by the foods, then do as you demand. If it does not obey your instruction, you should help it wallow by hand, then press the machine, encourage it to cater to your sign, and then award it something to eat to strengthen this conditioned reflex. At last, it will do wallow when you send the sign to it without order instruction or foods awarding.

### 6. Training to spring up for food

It is dangerous to take food directly when you award it during the training, you had better to throw the food up to sky, make it spring up to take food.

Firstly, you should stand face to face with your dog, let the dog look at food to tempt its attention, then you go back and throw food up on to its head, ordering it to "pick up" the food, it will spring up for food. Then train for strength for times. Please make sure that the height you throwing should be enlarge time and time till up to about one meter. Also, keep careful when it is too hungry to beat your hand! Of course, do not let kids feed dog in this way!
